

PRASHANT YADAV

AI Engineer | LLM Applications | RAG & AI Agents | Python Automation

Bilaspur, Chhattisgarh, India | yadavprashant100804@gmail.com | +91 8840793671 | [LinkedIn](#) | [GitHub](#)

Experience

Co-Founder & Founding Member | FEMUR Studio

Nov 2025 – Present

- Shipped **15+ software products** as part of the founding team, driving end-to-end delivery across requirements, architecture, engineering, integrations, deployment, and production support.
- Architected LLM-powered features using **2 major LLM providers** (OpenAI, Anthropic), LangChain-based **RAG pipelines**, vector databases, REST APIs, and workflow automation.

Automation Developer Intern | Expertmind Technologies LLP

May 2025 – Jul 2025

- Built SaaS automation workflows and third-party API integrations across **5 delivery stages**: requirements, design, development, testing, and deployment.
- Streamlined repetitive business workflows using Python, browser automation, API integrations, and event-driven process logic.

Professional Summary

AI Engineer focused on **LLM applications, Retrieval-Augmented Generation (RAG), AI agents, backend development, API integration, and Python automation** using OpenAI, Anthropic, Gemini, LangChain, vector databases, FastAPI, REST APIs, webhooks, and browser automation. Co-founded FEMUR Studio and shipped **15+ software products**, with hands-on ownership across architecture, backend development, integrations, testing, deployment, and operations. Built **3 AI/automation systems** spanning EdTech, decentralized prediction-market trading, and payment recovery, backed by strong foundations in **Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks**.

Projects

Sikhsha AI - School ERP + AI Classroom Platform | [Live](#) | AI + EdTech

- Solved school-management workflow fragmentation with an ERP covering **6+ core workflows** including admissions, attendance, fee collection, dues tracking, parent communication, and role-based dashboards.
- Automated teacher preparation with **5 AI classroom tools** including a question generator, smart quiz engine, teaching-deck builder, lesson planner, and student doubt solver using LLM APIs.
- Unified **4 user roles** (administrators, teachers, students, parents) and integrated **Razorpay APIs and webhooks** for automated fee collection and dues tracking.

Autonomous AI Prediction Market Trading Agent | [GitHub](#) | TypeScript + Gemini AI + Web3

- Engineered an autonomous decentralized trading bot on **Gnosis Chain** to execute binary prediction-market trades on Presagio through **Gnosis Safe smart contract wallets**.
- Designed a **2-stage verification pipeline** using Google Gemini LLM and Tavily Web Search API to fact-check breaking news in real time, mitigating AI hallucination risk by **85%**.
- Implemented risk-adjusted position sizing, automated **ERC-1155** claim redemption, and a **5% maximum slippage threshold** with Ethers.js/Viem; added GraphQL ingestion via The Graph with SQLite persistence and market-volume monitoring above **\$15**.

AI Revenue Recovery & Payment Intelligence Platform | [GitHub](#) | Python + FastAPI + ML + Payment Automation

- Architected an end-to-end payment recovery engine that ingests failure webhooks, classifies root-cause categories, and executes deterministic recovery policies, **reducing involuntary churn by 22%**.
- Implemented robust fraud hard-stops and a deterministic decision engine, directly reducing manual review cases by **40%** and improving payment processing efficiency.
- Implemented multi-channel remediation with a **Baileys WhatsApp WebSocket bridge** and Retell AI voice agents, while deploying a Next.js + TypeScript + FastAPI control center and analytics stack using **Docker Compose, Nginx, and Google Cloud VPS**.

Technologies

Programming Languages: Python, TypeScript, JavaScript, C++, Java, SQL

AI & GenAI: Generative AI, Large Language Models (LLMs), OpenAI API, Anthropic API, Google Gemini, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Function Calling, AI Agents, Prompt Engineering, Embeddings, Vector Search

Frameworks & Libraries: FastAPI, Flask, Next.js, React, Node.js, Express.js, Scikit-Learn, Streamlit

Backend & APIs: REST APIs, RESTful APIs, API Design, API Integration, Webhooks, Event-Driven Workflows, WebSocket, GraphQL, API Testing

Databases: PostgreSQL, MongoDB, Redis, SQLite, Chroma, Pinecone, FAISS

Blockchain & Web3: Gnosis Chain, Gnosis Safe, Smart Contracts, ERC-1155, Ethers.js, Viem, The Graph

Automation & Tools: Selenium, Playwright, n8n, Zapier, Baileys, Retell AI, Postman, Git

Cloud & DevOps: Docker, Docker Compose, Nginx, GCP, Google Cloud VPS, Vercel, Cloudflare Tunnel, CI/CD, Cloud Deployment

Engineering & CS: Backend Development, Software Engineering, System Design, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Achievements

- Won 3+ college hackathons** through competitive project development, rapid prototyping, and problem-focused solution building.
- Solved 300+ DSA problems** across arrays, linked lists, trees, graphs, recursion, and dynamic programming on coding platforms.
- Placement Cell Lead** – Central University of Chhattisgarh; coordinated recruitment activities, industry outreach, and student-employer communication.

Education

B.Tech in Computer Science & Engineering | Central University of Chhattisgarh | Bilaspur, India

Oct 2023 – May 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Web Development, Theory of Computation, Cybersecurity
